Fresh Siam (*Chromolaena odorata*) Weed Leaf Extract in the Control of Housefly (*Musca domestica*)

Liswayee H. Acero Ed.D.
Department of Natural Sciences, College of Arts and Sciences,
San Beda College Manila Philippines.
Email: llyacero@yahoo.com

Abstract—*Chromolaena odorata* has been known as an invasive weed in agricultural farms. There are studies on its insecticidal properties, but its potential as control to housefly is not yet explored. This research was undertaken to determine the beneficial use of fresh Siam weed leaf extract (FSWLE) to eradicate housefly. Results of this study is beneficial to farmers/vegetable growers in *Sino Pacil in Manila*. Moreover, San Beda College Manila, a partner community of San Beda College Manila in its extension or outreach program, Village In Profit (Village Prosperity) and chicken dung to fertilize their vegetable. Chicken manure is an organic fertilizer that attracts houseflies which act as vectors of common diseases. Specifically, this study seeks to find out what best concentration and what exposure technique of fresh Siam weed leaves will get rid of the housefly. Experimental research method with five treatments was utilized. Gathered data was analyzed using ANOVA two-tailed. Findings of the study revealed that highest percentage of mortality after thirty two hours observation was obtained from treatment 5 (80% percent FSWLE, applied as spray). Based on this result vegetable growers, farmers, household members can use FSWLE to eradicate houseflies, to prevent the occurrence of diseases that it brought about in the house.

Index Terms—*Chromolaena odorata*, *Musca domestica*

1. INTRODUCTION

Research for many decades in Philippine educational system has been viewed as a separate entity from outreach or community involvement activities. However, the current trend in the educational system is to provide a strong link between research and community involvement. This will make the output of any research endeavor more fit to the community where the research is in need. At the same time this will help people in the community in the attainment of better quality of life.

San Beda College of Manila, one of the private learning institutions in the Philippines is also in the threefold function of instruction, research and community involvement. One of the general communities of San Beda College is *Sino Pacil in Manila*. Moreover, San, in mountain province, *Pacil* is located in mountainous slope range of 15 to 18 degree. It is approximately 2,500 meters above sea level [1]. The main source of livelihood of the people in *Pacil* is vegetable growing. Most of the vegetable growers/farmers used chicken dung as organic fertilizer on their farms, without realizing that the offensive odor from chicken dung attracts houseflies which act as vectors of pathogens that cause diseases.

Housefly considered one of the most important pests which cause health problems in the environment as it accompanies human during their daily activity everywhere, on work site or in rest places causing many disturbances to them [2]. As vectors of diseases house flies can transmit more than 100 human and animal disease-causing organisms, including protozoa, bacteria, viruses, rickettsia, fungi, and worms. House flies are considered intermediate hosts for tapeworms and many transmit insects to caged birds. Flies mechanically carry insects and other arthropod eggs on their feet from manure to pens, feed, and water. Fly maggots ingest tapeworm and insect eggs from the poultry manure and retain them in the gut until maturity. In turn, infected flies are ingested by the feeding bird. Although it appears that virus influenza is spread principally by contaminated shoes, clothes, and equipment, the virus has been isolated from adult house flies [3].

The use of commercial insecticide to kill housefly can solve the housefly infestation in *Pacil*. However, chemical method is the last recourse, since chemical method will harm the environment and pose respiratory hazard to villagers. The use of herbal plants in the area is the most practical and safest method for the control of housefly infestation. There are many herbal plants in the area and one of these is the natural growing weed commonly known as "siam", *bagsey* or *gony*, with a scientific name *Chromolaena odorata*.

C. odorata is viewed as a major agricultural sustainability problem in many tropical countries. It was recognized as the most problematic weed in coconut plantations in Sri Lanka as early as 1944, and became a problem in rubber, palm oil, tea, coffee, cacao, cash and other plantation crops in Asia [4]. In the Philippines Siam weed is a highly invasive plant species which is poorly studied in spite of the fact that it is hard to eradicate, a nuisance in plantations, and known to harm farm animals and domestic forage and native plant species [5]. *C.*

Soluble Extract from *Moringa oleifera* Leaves with a New Anticancer Activity

Il Lae Jung*

Department of Radiation Biology, Environmental Radiation Research Group, Korea Atomic Energy Research Institute, Daejeon, Korea

Abstract

Moringa oleifera has been regarded as a food substance since ancient times and has also been used as a treatment for many diseases. Recently, various therapeutic effects of *M. oleifera* such as antimicrobial, anticancer, anti-inflammatory, antidiabetic, and antioxidant effects have been investigated; however, most of these studies described only simple biological phenomena and their chemical compositions. Due to the increasing attention on natural products, such as those from plants, and the advantages of oral administration of anticancer drugs, soluble extracts from *M. oleifera* leaves (MOL) have been prepared and their potential as new anticancer drug candidates has been assessed in this study. Here, the soluble cold Distilled Water extract (4°C, concentration, 300 µg/mL) from MOL greatly induced apoptosis, inhibited tumor cell growth, and lowered the level of internal reactive oxygen species (ROS) in human lung cancer cells as well as other several types of cancer cells, suggesting that the treatment of cancer cells with MOL significantly reduced cancer cell proliferation and invasion. Moreover, over 90% of the genes tested were unexpectedly downregulated more than 2-fold, while just below 1% of the genes were upregulated more than 2-fold in MOL extract-treated cells, when compared with nontreated cells. Since severe dose-dependent rRNA degradation was observed, the abnormal downregulation of numerous genes was considered to be attributable to abnormal RNA formation caused by treatment with MOL extracts. Additionally, the MOL extract showed greater cytotoxicity for tumor cells than for normal cells, strongly suggesting that it could potentially be an ideal anticancer therapeutic candidate specific to cancer cells. These results suggest the potential therapeutic implications of the soluble extract from MOL in the treatment of various types of cancers.

Introduction

Various types of plants have been used for several centuries worldwide not only as dietary supplements but also as traditional treatments for many diseases [1,2,3]. Indeed, the fact that traditional medicines have been widely used worldwide demonstrates the potential of plants as sources of bioactive compounds, including potential antitumor, antioxidant, antiobesity, and antimicrobial molecules. Among these plants, the widely cultivated *Moringa oleifera* (*Moringa* or *drumstick tree*), a rapidly growing perennial tree, was used by the ancient Romans, Greeks, and Egyptians, and has been naturalized from the tropics to the sub-Himalayan regions (e.g., India, Pakistan, Bangladesh, and Afghanistan), Oceania, Latin America, Africa and tropical Asia [4,5,6,7].

For centuries, *M. oleifera* has been used as a traditional medicinal source. Additionally, besides being edible, all the parts of the *Moringa* tree (e.g., pods, seeds, and leaves) have long been employed for the treatment of many diseases, and therefore, it was called a "miracle vegetable" [6,8,9]. Since it is a significant source of fats, proteins, beta-carotene, vitamin C, iron, potassium, and other nutrients [7,10], the *Moringa* tree is highly nutritious. For these reasons, some parts of this plant have drawn much attention and have been studied for its various biological activities, including antiatherosclerotic [11], immune-boosting [12], anti-cardiovascular diseases [13], antiviral [14,15,16], antioxidant [2,17,18,19],

antimicrobial [18], anti-inflammatory [20] properties and tumor-suppressive effects in skin papillomagenesis, hepatocarcinoma cancer, colon cancer, and myeloma [1,21,22,23].

However, only a few studies have reported the anticancer activity of *M. oleifera* leaves (MOL), and most of them have focused on the evaluation of their efficacy with respect to tumor-suppressive activity, but not on the molecular basis of the tumor-suppressive activity. Additionally, most studies have been conducted using solvent extracts of MOL and not their soluble extracts [1,17,18,21,24].

Solvent extraction is the most frequently used technique for the isolation of bioactive compounds from plants. Therefore, the recovery of bioactive compounds from *M. oleifera* has been typically accomplished using various solvents, such as methanol and ethanol, as well as hot water and buffers [1,17,18,21,24]. Nevertheless, the majority of the studies focused on solvent extracts because the efficacy of solvent extraction is higher than simple water extraction. In fact, the buffer extract of *M. oleifera* leaves was much less effective than the solvent extracts for hepatocarcinoma cells [1]. Moreover, solvents can dissolve the many useful organic molecules found in plants, such as phenolic compounds.

In the present study, I prepared a cold water-soluble MOL extract and investigated the possibility as anticancer drugs in

How many times have you found an old company PDF (or image) and needed to gain quick access to the text within, only to find you cannot locate the editable version of the file or copying and pasting is killing you? Or maybe you only need to quickly convert a PDF or image into a Word or PowerPoint document...
Share you can purchase software that will allow you to do just that, but if you're a Google Drive user, you already have that ability at your fingertips. That's right, Google Docs does a pretty impressive job of converting PDF documents to regular Google Docs. It's not perfect, but it's a damn good PDF to Word and image—but if you're looking for a means to get to that precious text, this is a handy way to do just that.

Signed in another tab or window. However, malnourished individuals may experience symptoms of vitamin deficiency C over time, including: Weak fatigue fatigue fatigue Easy bruising Joint pain Skin breakdown Weakened tooth enamel Gum inflammation Severe vitamin C deficiency is referred to as scurvy. There are loads of products out there that claim theyÁÁÁll save your skin, but some can cause damage. According to researchers the perfect mixture is 15% Vitamin C with 1% Vitamin E and 0.5% ferulic acid. They can also shield you from sun damage and reduce stretch marks. Therefore, if the main source of vitamin C is from naturally occurring foods, it is near-impossible for excess vitamin C to produce side effects. While it is a good source when an individual is in need of a vitamin C boost, supplements are not meant to replace a diet rich in naturally derived vitamin C.What Happens When You Have Too Much eÁÁÁ or Too Little eÁÁÁ Vitamin C?Vitamin C is a water-soluble vitamin that can be easily flushed out of the body via urination when it is not needed. WeeÁÁÁre here to answer all of those burning questions in this complete guide and reveal the many benefits Vitamin C serums offer for your skin.Á ÁWhat Are Vitamin C Serums?There are many variations of Vitamin C, but the most popular is ascorbic acid, a common ingredient in skincare products. The Index is the particular page number from where text needs to be extracted. Since the human body cannot spontaneously generate this nutrient, vitamin C must instead be absorbed from outside sources, such as vitamin supplements or foods that are naturally rich in it. Commonly found in cold and flu preventative supplements, vitamin C strengthens and speeds up immune system functionality. Hydrates Your Skin: Dry skin is a common issue, but Vitamin C can help to give your skin that much-needed moisture boost. Sometimes we need to extract the text from the particular area (i.e. the left upper corner of the page). Foods that contain high concentrations of vitamin C have been linked with a lower risk of cardiovascular disease, like heart attack and stroke. There are also numerous packaged food products such as cereals, which have been enriched and fortified with vitamin C, so that the nutrient can be easily obtained. Although research does not indicate that the intake of vitamin C alone can prevent the onset of cold or flu, proper daily intake can shorten the duration of an infection or decrease the severity of symptoms. Call the method Accept on a particular page of the Document object. In addition, regular vitamin C intake, along with other vitamins, has been associated with a reduced risk for the development of age-related cataracts, a cause of visual impairment in the United States. Common sources of vitamin CVitamin C can be easily obtained through the many different foods, including: Photo Courtesy: Akaradech Pramoonsin/Momento/Getty Images Citrus fruits and juices (orange, grapefruit, lemon, lemon and tangerine) berries Melons Broccoli of neozeland tomato Red peppers Spinach Squash Potatoes Cooking these foods can result in the loss of some of the vitamin contents, so it is ideal to ingest them raw, all or juice. Add a vitamin serum C to your beauty regimen and enjoy a bright complexion. MORE OF BLOGLINES Photo Courtesy: Flashpop/DigitalVision/Getty Images Whether it is in the form of an effervescent drink or flavored lozenges, preventive cold supplements and flu almost always highlight vitamin C as one of its main ingredients. Most of us get stuck with some scars, but vitamin C helps to fade scars and even out any discoloration. However, all variations of vitamin C have anti-inflammatory benefits. Vitamin C Serums are products that contain a high level of vitamin C. Photo Cortesia: Violet Stoimenova / E + / Getty Images From vitamin C-rich foods are so readily available nowadays, symptoms ofof vitamin intake C are also rare in the United States. It's not all good. In fact, powerful vitamin is unstable when it is exposed to air and light. leonori/Shutterstock leonori/Shutterstock70 years Vitamin C has been one of the largest weapons in the skin care Straight. Environmental factors such as lifestyle and pollution choices can increase the elasticity of your skin. Therefore, it is important that you try to increase your production production. The TextFragment object provides access to the research text, text properties and allows you to edit text and change the state of text (source, source size, color, etc.). Fortunately, vitamin C is a powerful antioxidant that reduces red sports and prevents solar burns from spreading. The ParagraphBsorber class performs the search for text and paragraphs and provides access to retaining and poignons that describe it in the space of text coordinates. In our example, the LimitToPagebounds property indicates that the text is researched within the boundary of the página and the property retained indicates in the upper half of the padga. ASPOSE.PDF Varária Classes to extract the data: Textabsorber, TextFragmentAbsorber, paragraph. Like granted people, breastfeeding, smoking or using oral contraceptives so a lower blood of vitamin C than others, higher doses of vitamin C may be needed to achieve ideal results in these individuals. In the following example, we will configure a LimitToPagebounds property and a retaining property. Also known as asance, vitamin c is fundamental to live healthily. Smells are combined with german and vitamin E. For example, it plays a role in the healing of wounds and helps to maintain many essential bodily tissues. Reduces stretch marks: Yes, vitamin C serum can even help prevent these unpleasant stretch marks, squeezing the skin. You can not perform this action at the moment. Vitamin C helps with facial and inflammation redness, reducing the appearance of broken capillaries.
